xinexus NUCLEAR AG – The Knowledge Services Company for the Nuclear Industry –

xinexus NUCLEAR AG is a leading provider of services dedicated to the nuclear industry. Located in Switzerland, we serve nuclear and nuclear-related industries, government agencies and organizations worldwide.

xinexus NUCLEAR AG combines its specific domain knowledge in the nuclear field with a rich experience in knowledge management. We build on 20 years of experience with Convera's¹ products of innovation in developing intelligent and advanced search, retrieval and categorization technologies. While xinexus' portfolio of services is not limited to Convera's products, we mobilize our privileged access to Convera's experience and personnel to the full advantage of our customers.

Convera's software powers some of the world's largest and most demanding knowledge management installations, establishing the foundation for information intensive business processes.

xinexus NUCLEAR AG provides solutions that scale seamlessly from the performance of standard tasks to the accomplishment of the seemingly impossible. In particular we concentrate on:

- Knowledge, data and content management systems
- Document management systems
- Document and knowledge preservation
- Content indexing and classification
- Advanced information retrieval and knowledge mining
- Knowledge capture
- Integrated work flow solutions
- Code transformation for legacy software

xinexus NUCLEAR AG offers basic document management services like...

- Scanning of paper based documents and microfiche
- Multi-lingual optical character recognition
- Secure storage of documents and data in certified vaults
- Format conversions of digital documents

... and on demand we add:

- Full bibliographic descriptions
- Abstracting
- Industry and domain specific keyword indexing and subject classification

We work with your existing tools, or develop thesauri, taxonomies and classification systems, as required.

xinexus NUCLEAR AG takes knowledge management beyond the printed word: we capture tacit knowledge from *your* experts.

- Structured interviews,
- audio-visual recordings and
- advanced screening room technology

help to document unrecorded skills and implicit knowledge and link events, documents and people.

xinexus NUCLEAR AG endeavours to offer a comprehensive suite of knowledge management products and services for the nuclear domain. Products are developed on the customer's site or implemented as turnkey solutions. Services are rendered on-site or via our offices, as required.
